

Made for the future

ArciTech drawer system

Incredibly smooth running action

- The unique prism principle promises a smooth and easy running action
- Minimal opening effort optimises convenience
- Perfectly balanced soft-closure gently shuts drawers with a maximum loading capacity of 80Kg
- Quality you can feel

Unequalled stability

- The unique prism principle guarantees maximum lateral stability – including wide drawers
- The profiles geometry ensures exceptional tracking stability
- Runners are available in loading capacities of 40kg (as standard), 60kg and 80kg – ArciTech can meet even tomorrows demands

Incredibly broad, platform-based line up

- Offering a wealth of combination options, the ArciTech platform allows your customer to individualise their kitchen and you, the retailer to respond to any trend
- Getley offer the ArciTech drawer in Anthracite, Silver and White, with the steel TopSide as standard on Pan drawers – DesignSide in glass is also available as an upgrade

What's more

- With ArciTech you are opting for stability and sturdiness
- High quality materials are being used
- Superior connection between drawer front, side panel and rear panel

So, to celebrate the launch of the ArciTech drawer system we would like to offer you the opportunity of receiving 5 drawers FOC to convert your existing displays to the drawer that is made for the future
